### ON THE ELLIPSE.

The Approaching Eacing Meeting at Benning's a Good One.

The outlook for the second meeting of the Washington Jockey Club, which commences at Benning's pext week, is exceedingly bright, and from present Indications will be the most successful meeting ever held in this vicinity. the weather is good the attendance will probably be larger than ever before, for the club will undoubtedly present better attractions than have heretofore pre-

In the parlance of the street, the club has made a "ten strike," in add-ing a steeple chase to the programme on alternate days. The programme for the ten days' racing is exceptionally good, and as the association has been exceedingly liberal to the distribution of purses, all the crack flyers will be entered in the different events. There will be no opposition this year on the part of Northern tracks, as all of them close to morrow, and owners will have no other place to run their horses ex-

cept Benning's. The incentive in the shape of good prize money assures the best kind of sport.

The judge and starter have not as yet been selected, but the probabilities are that Colonel Simmons will be chosen for the first position and Caldwell will handle the flag. The experiment of hav-ing a regular judge, and one in whom the utmost confidence could'be placed, worked very satisfactorily last spring. so much so that the club will make that a permanent feature hereafter of its semi annual meetings.

### BETWEEN THE NETS.

Wielders of the Racquet Playing for the Championship,

The second day of the tennis tournsnext for the southern championship were replete with interesting sport. The different events were botly contested, and the meagre crowd was enthusiastic in its applause of the fine playing, ex-pecially so in the match between Mc-Cawley and Thomson, which the latter won, but after a fierce fight.

In the doubles between Wright and Billings, and Borden and Byrnes, there

was some clever quick play and excel-lent judgment shown in the placing of The following is the summary:

Consolation prize preliminary round— Pa nier beat Agneau, 6-2, 6-4. First round—Davidson beat Peter, 6-1, 6-2; Wosten beat Chambers, 2-6, 8-6, 6-2; Borden beat Lyon, 6-2, 6-1. Second round—Borden beat Wooten, 6-1, 8-6.

Doubles - McCawley and Woodward beat Hall and Hall by default: Peter and Peter beat Agneau and Walker, 6.3, 4.6, 6.0; Wright and Hillings beat Byrnes and Bor-den, 6.9, 6.9

The finals will be played to day. It is also expected the semi fluxla in doubles, and the fluxla in the singles will be commenced.

## NOT THE MAN.

AT FIRST HE WAS SUSPECTED OF BEING A MURDERER.

Arrested for a Marderous Assault. The Officers Throught He Was the Stayer of John Waynes,

Officer Mulvey of the Fourth precinct yesterday afternoon arrested a colored man who is supposed to be Frank Heideman, a murderer who has evaded arrest for over three years. He was charged with having made a murderous ; assuult upon James R. Garfield, another colored man who had but recently came to this city from England.

The two met on Third street near B and had some conversation about a room. The poleoner found that the new comer ad a me money, whereupon he drew a ulliving revolver and demanded it. Oar id grabbed the weapon and turned it e just as it was discharged by the the man, who is supposed to be Heide man, turned and run, but was arrested y Officer Mulvey before he had gone

when the han was taken into the station house. Officer Chamberlain said:
"Why I believe that is Frank Heideman, the murderer of John Waynes, whom we have been looking for for

three years."
Officer Hart and several others felt but Officers Bailey and Barney were of a different opinion. The latter arrested the man a short time ago for disorderly conduct, and knew bis name to be Lawson Harris. This is the name given by the prisoner, and he claims that he has lived in the West for five years. A number of the officers think that the man is eleverly concealing his identity.

A further investigation was made about the prisoner, and there are about as many who are ready to swear that he is not Heldeman as there are who will say that he is.

When the prisoner was in the dock at

court this morning charged with an as-sault with intent to kill Garfield, Lieu-tenant Amiss said: "Why, that man does not compare with Frank Heldeman at all. He is not as tall and will not weigh as much as he by sixty pounds. Heldeman used to be called Frank Daws, and Sergeant Dunnigan still carries the scar over his eye that he gave him several years ago at the corner of

Fighth and O streets."

John Walker, alias Nelson Harris alias Frank Daws, alias Frank Heide-man, pleaded not guilty to the charge against him. Garfield, who claimed to come from Liverpool, but no doubt came from the East Indica and had a very noticeable French accent, could not tell a very straight story, but Sergeaut Dely, John Dorsey and Wm. Witston astisfied Judge Miller that the can was guilty. He was placed under

Late this afternoon it was ascertained that John Firmming, an employe at the White House stables was an uncle of the man supposed to be Helden an, and he was willing to testify that his proper name was Parria Harris mother, he says, lives Mount Pleasant, and can most surely brilly him. According to the records deldeman was five feet eleven Heldeman was five fuet eleven inches in height, while the prisoner is only five teet seven. Officer Barnle, on whose heat Heldeman lived for a num-ber of years, says that he was several shades lighter than the man now in

At Police Headquarters there seems to be some difference of opinion, but those best qualified to judge are satisfied that the man is not the murderer looked

### RAILROADS IN SIBERIA.

The Difficulties Attending the Successful Running of Trains,

From the Russiche Recus. The mean temperature of January at Tchelyaba is 17 degrees centigrade; between Omek and Lake Baikal, from 19 22 degrees; on the Transbalkal Line, rom 25 to 23 degrees; on the Ussuri Line, from 24 degrees at its northern end to 14 degrees at Viadivistor. Along the entire route the cold sometimes exceeds 40 degrees, the freezing point of mercury, and over a considerable part of it the temperature not infrequently remains below 50 degrees for a veral days at; a time. If frosts of 30 degrees interrupt traffic to European Russis, causing steel wheels, axles and and semetimes rails to break, would not the conditions on the Siberian lines occasion still greater difficulties and even affect the security of the Iron bridges? These questions ought to be dielded by experimental tests, which could best be made at the university town of Tomsk, lying on the line of the proposed railroad.

Low temperatures have different ef-ects, not only on the human organism, but on railroads, according as they are accompanied by a still atmosphere or by more or less violent winds. When the wind blows at a rapid rate, the interior of iron objects grows cold quickly. On the plains of Western Siberia, west of Ob, the line is exposed to heavy winds and frequent snow storms. In the mountainous regions of Central Siberia, the strength of the wind diminishes. In the Transbalkal, at the coldest period of the year there is the least wind. From Viadivestok to the Ussuri district, severe north and northeast storms occur in autumn, win ter and spring; however, there is gen erally no snow, and therefore no danger of a stoppage of traffic. Beyond the mountains the winds are not strong, but there are often heavy falls of snow, which will make it advisable to pre For coughs and colds take Lemon Hot line of the railroad.
